

Light-cone ball, unbinned supernovae, axis opposite to the CatWISE excess

- CC + SN: 68% region
- fitted α_{high}
- fitted $\alpha_{\text{high}} = 0.50$
- CC + SN + CatWISE: 68% and 95%
- Quaia slices: best fit
- all compatible within 1σ
- CatWISE excess within 1σ
- Quaia slices within 1σ
- /// α_{high} at the end of its allowed range
- ☆ CC + SN minimum ($\Delta\chi^2 = -0.68$)
- ◆ CC + SN + CatWISE minimum
- ◆ CC + SN + CatWISE + Quaia minimum
