

Light-cone ball, unbinned supernovae, axis opposite to the CatWISE excess

..... CC + SN: 68% region

--- fitted  $\alpha_{\text{high}}$

— CC + SN + CatWISE: 68% and 95%

- - - Quaia slices: best fit

— all compatible within  $1\sigma$

■ CatWISE excess within  $1\sigma$

■ Quaia slices within  $1\sigma$

☆ CC + SN minimum ( $\Delta\chi^2 = -0.68$ )

◆ CC + SN + CatWISE minimum

⬠ CC + SN + CatWISE + Quaia minimum
